

RED TEAM PROJECT SCOPE

April 29, 202026

RED TEAM FRAMEWORKS & METHODOLOGIES

A successful red team engagement begins with clearly defining the goals/objectives of the engagement with the client.

The red team is then tasked with planning and orchestrating the engagement based on the predefined goals/objectives.

It is important to note that red team engagements do not focus on searching for vulnerabilities. Instead, they target security operations as a whole.

The result of a red team engagement should highlight the Blue Team's ability to detect and defend against attacks and show where improvements can be made.

Red team engagements should also simulate/emulate new TTPs so the Blue Team can learn how to detect and defend against them.

A successful red team engagement requires a structured and methodical approach, especially when simulating/emulating an adversary.

It is therefore recommended to use an appropriate red team methodology/framework as a base to plan, structure, and orchestrate the campaign.

Frequently used red team methodologies/frameworks include:

- Cyber Kill Chain
- MITRE ATT&CK Framework

- Cyber Kill Chain (Lockheed Martin):
<https://www.lockheedmartin.com/en-us/capabilities/cyber/cyber-kill-chain.html>
- MITRE ATT&CK -
<https://attack.mitre.org/>
- Unified Cyber Kill Chain -

1. Cyber kill chain:

Cyber Kill Chain

2. What is MITRE ATT&CK?

What is MITRE ATT&CK?

3. ATT&CK vs CYBER KILL CHAIN

MITRE ATT&CK	Cyber Kill Chain
Recon	Recon
Resource Development	Weaponization
Initial Access	Delivery
Execution	Exploitation
Persistence	Installation
PrivEsc	C2
Defense Evasion	Actions On Objectives
Credential Access	
Discovery	
Lateral Movement	
Collection	
Command and Control	
Exfiltration	
Impact	

ROLE	RESPONSIBILITY
Red Cell	Group that plays OPFOR (opposing force) during red vs. blue exercises. A red cell is the components that make up the offensive portion of a red team engagement that simulates the strategic and tactical responses of a given target. The red cell is typically comprised of red team leads and operators and is commonly referred to as Red Team instead of Red Cell.
Blue Cell	The blue cell is the opposite side of red. Is it all the components defending a target network. The blue cell is typically comprised of blue team members, defenders, internal staff, and an organization's management.
White Cell	Serves as referee between Red Team activities and defender responses during an engagement. Controls the engagement environment/network. Monitors adherence to the ROE.

ROLE	RESPONSIBILITY
Red Team Lead	Serves as the operational and administrative lead for the Red Team. Conducts engagement, budget, and resource management for the Red Team, Provides oversight and guidance for engagements, capabilities, and technologies. Ensures adherence to all laws, regulations, policies, and Rules of Engagement.
Red Team Assistant Lead	Assists the team lead in overseeing engagement operations and operators. Can also assist in writing engagement plans and documentation if needed.
Red Team Operator	Complies with all Red Team requirements under the direction of the Red Team Lead. Operational executor of the engagement. Applies Red Team TTPs to the engagement. Provides technical research and capability to the Red Team. Keeps detailed logs during each phase of the engagement.
